

DEMOCRACY?

At a time of global economic crisis, when our politicians are making important decisions about the environment and the economy that affect us all, it is crucial that they genuinely represent the views of the people that they serve. Unfortunately, this is simply not happening here in the UK.

At the last General Election the Labour Party won a massive majority in parliament even though six out of ten people voted against them.

Because of the way our votes are counted, the parties can tell in advance whose votes will make a difference and whose won't. Unless you are 'lucky' enough to live in a marginal constituency, it is unlikely that your vote will count or that your voice will be heard.

There is a better way. We want to change the electoral system to give you the power to hold your MPs and local councillors to account for the decisions that they take. We want to put an end to safe seats and make all elections real contests where your vote really counts. We believe that a fair voting system will allow politicians to better represent you and help them to tackle the serious issues facing our society.
